

Stormwater Project for Greater Mondawmin/Coppin Heights-Ash-Co-East (ER 4062/E33)

The Baltimore City Department of Public Works (DPW) is required to install Best Management Practices (BMPs) that reduce and treat stormwater entering its waterways per its federal Municipal Separate Storm Sewer System (MS4) Permit. Greater Mondawmin/Coppin Heights-Ash-Co East is one of the areas selected for BMP curb bumpouts.

What are Best Management Practices?

Best Management Practices (BMPs) such as rain gardens, swales and micro-bioretenion facilities. They are planted areas that collect stormwater runoff and allow the water to filter through the facility before flowing to a storm drain, reducing the pollutants entering local streams and the harbor. Here is a picture of a BMP curb bumpout that is currently in design for your area.

Stormwater Bumpout Facility at Bush Street

What is proposed for Greater Mondawmin/Coppin Heights-Ash-Co-East?

DPW is proposing up to 4 stormwater bumpouts in this area identified on the map to the right. These BMP facilities are currently in design and are to aid the City of Baltimore in fulfilling its Municipal Separate Storm Sewer System (MS4) Permit requirements.

When will they be installed?

The construction of this project has been postponed. The updated schedule for construction will be posted in this factsheet.

Comments/Questions?

Please contact the City Project Manager Ms. Kirastin Spence with any question you may have via email at: kirastin.spence@baltimorecity.gov, and/or office at: (410)-396-3440.
