BALTIMORE CITY DEPARTMENT OF PUBLIC WORKS

WC 1367 Old Goucher
Water Main Replacement Project Details

Project Background

DPW supplies drinking water to 1.8 million residents in the Metropolitan Area which encompasses 3,800 miles of water mains, 67,500 valves and 23,000 fire hydrants. DPW is responsible for maintaining the 1,500 miles of water mains located within city limits. The City is committed to renewing it's aging infrastructure, which includes water mains that are nearly 100 years old.

Project Purpose

- ▶ Improve water flows and water quality
- ▶ Reduce water service disruptions and costly repairs
- ▶ Minimize water main breaks
- ▶ Minimize street closures

Project Activities

- ▶ Replacement or relocation of **1.83** miles of water mains
- ▶ Installation or replacement of **40** valves
- ▶ Installation or replacement of **8** fire hydrants

Project Schedule

SPRING 2023 — ADVERTISE PROJECT ❯ **FALL 2023** — AWARD CONSTRUCTION PROJECT ❯ **WINTER 2023** — BEGIN CONSTRUCTION ❯ **SPRING 2025** — COMPLETE CONSTRUCTION

Did you know?

Home warranty companies such as HomeServe USA and others offer their members the opportunity to affordably cover and complete exterior water and sewer line repairs on the homeowner's side of the property line. Team up with the home warranty company of your choice as DPW water main system upgrades are being made. DPW is not responsible for upgrades or repairs to lines on the private property. Typically, homeowners' insurance policies do not cover repairs to exterior, underground water lines. *Financial assistance for exterior line repairs may be available through HomeServe USA or other warranty companies for qualifying homeowners. To learn more about HomeServe USA, visit www.BaltimoreServiceRepairs.com or call 1-855-807-6631 or contact your home warranty provider.

*Homeowners are encouraged to check with their insurance companies and explore options when considering optional private service line protection plans.
