1.0 Executive Summary

This Calendar Quarterly Report (Quarterly Report) is submitted pursuant to the requirements of a Modified Consent Decree (MCD) entered on October 6, 2017 by the United States District Court for the District of Maryland. This Quarterly Report is intended to provide an update on the progress of remedial measures required by the MCD and the status of various programs to be implemented. The primary requirements for the Quarterly Report are specified in Paragraph 21 of the MCD. Baltimore City (City) has maintained compliance with the MCD throughout the Calendar Quarter, and progress on key MCD paragraphs is provided below. This Quarterly Report includes the City's progress for the Calendar Quarter ending December 31, 2017.

Paragraph 8: Elimination of Sanitary Sewer Overflow Discharges:

The City has identified a total of 15 Sanitary Sewer Overflow (SSO) structures, following the initial listing of SSO structures in the 2002 Consent Decree, and four (4) have been eliminated. Two (2) of the four SSO structures were eliminated in this Calendar Quarter. The City will be submitting a corrective action plan for the newly discovered SSO structures in the next reporting period. Flow monitoring is ongoing and rainfall data continues to be collected from nine (9) citywide gauges to inform the planning for timely elimination of the remaining SSO structures.

Paragraph 9: Implementation of Sewershed Plans:

The City continues to progress with the design and construction of the Phase I projects during this Calendar Quarter. Sanitary Contract (SC) 902 Sewer Rehabilitation in Dundalk Sewershed and SC 937 Sewer Rehabilitation in Herring Run Sewershed both received Conditional Acceptance for construction completion in the Calendar Quarter. In total, the City has completed twenty (20) construction projects, with another eleven (11) projects in the final phase of design and six (6) active construction projects. The Back River Wastewater Treatment Plant (WWTP) Headworks Project received Notice to Proceed (NTP) on June 29, 2017 and is progressing with completion of the majority of the excavation and site work associated with the foundation for the new influent pumping station.

Building Backups

During this Calendar Quarter, the City has made significant progress to continue establishing the Expedited Reimbursement Program. In accordance with Appendix E of the MCD, the program will begin in April 2018.

In accordance with Paragraph 21, the City has also provided a reporting of Building Backups for the Calendar Quarter. The City notes that these backups may have a variety of causes, including roots; improper disposal of wipes, fats, oil, and grease (FOG), or other inappropriate items; infiltration and/or inflow; or issues in public or private infrastructure. In order to address these issues proactively, the City will continue to implement ongoing measures for the Collection System to address grit/debris, fats/oils/grease, roots, and illegal connections through inspection, cleaning, education, and enforcement.

In addition to the progress reported throughout this Quarterly Report, the attachments that follow detail SSO events, Building Backups, and Sanitary Discharges of Unknown Origin (SDUO) that occurred during the Calendar Quarter. A compact disk with flow monitoring data; rain gauge data; SSO overflow tables; and SSO 5-Day Reports will accompany this report.

2.0 Sanitary Sewer Overflows

Sanitary Sewer Overflows (SSOs) are spills, releases, or discharges of wastewater from any portion of the Collection System. Unless discharged from an approved outfall in accordance with an NPDES permit, these discharges are violations of the Clean Water Act. The City reports SSOs per the requirements of the MCD, and accrues stipulated civil penalties in accordance with Paragraph 33 of the MCD. Attachment 1 lists the SSOs that occurred during the Calendar Quarter.

2.1 SSO Structures

Historically, many utilities, including Baltimore City, managed high sewage flows by constructing SSO Structures that provided relief to interceptor sewers by discharging excessive flows to adjacent receiving waters through overflow pipes. As such, SSOs often occur during wet weather (rainfall or snow melt). The excess water from these wet weather events may enter the Collection System from public or private assets and cause overflows into rivers and streams before reaching the City's wastewater treatment plants. Prior to the Clean Water Act, the approach for designing sewer systems was to place these SSO Structures at various locations within the system for these discharges to occur. Under sub-paragraph 8.b of the MCD, the City must eliminate all SSO Structures. To date, the City has eliminated 60 out of 62 SSO Structures identified in the 2002 Consent Decree. The remaining SSO Structures identified in the 2002 Consent Decree (#67 and #72) cannot be eliminated until the Back River Wastewater Treatment Plant (WWTP) Headworks Project is constructed. Since 2002, the City has discovered an additional 15 SSO Structures, and eliminated four (4) of those newly identified structures. Under sub-paragraph 8.b (iii) of the MCD, when a new SSO Structure is discovered, the City must submit a plan and schedule to EPA and MDE within 90 days after discovery to eliminate the SSO Structure. SSO Structures are monitored remotely, and any discharges from the structure are reported to EPA and MDE. The discharges from SSO Structures that occurred during the Calendar Quarter are provided in Attachment 2. Progress on the Back River WWTP Headworks Project is provided in section 3.0 (Phase I Projects).

Table 2-1 lists the SSO structures that must be eliminated under the MCD, along with the date of actual elimination for any SSO Structure(s) eliminated during the Calendar Quarter. After verification, newly discovered SSO structures will be added to Table 2-1. The substantial completion and elimination dates will be assigned to each SSO Structure upon approval by EPA and MDE of the City's proposed corrective action plans. Once an SSO Structure is eliminated, the structure will be removed from Table 2-1 in the following Calendar Quarterly Report.

Table 2-1. Current SSO Structure Status

SSO #	Manhole ID	Location ¹	Sewershed	Date of Substantial Completion of Construction	Date of Elimination
67	S31MM_013MH	Falls Road, approx. 1,100' northwest of US 1 bridge intersection	Jones Falls	Jan 1, 2021	July 1, 2022
72	S37GG_007MH	Rear of 428 East Preston St.	Jones Falls	Jan 1, 2021	July 1, 2022

157	S35YY_036MH	East 32 nd Street & St. Paul/Hargrove Alley	Jones Falls	TBD	TBD
158	S37GG_040MH	428 E. Preston St.	Jones Falls	TBD	TBD

¹SSO Structure locations are shown on Figure 3-1 in the next section.

(A) - Actual date.

The City has eliminated SSO Structures #150 and #151, and flow monitoring has also been completed for these structures. There were no overflows observed during the flow monitoring period conducted between July 17, 2015 and November 30, 2017 at SSO structure #150, and between July 12, 2015 and December 04, 2017 at SSO structure #151. The collected data in conjunction with the hydraulic model analysis demonstrated that these structures can be permanently eliminated. Accordingly, SSO Structure #150 was eliminated on November 30, 2017, and SSO Structure #151 was eliminated on December 04, 2017.

The City has evaluated SSO Structure #153 and flow monitoring has also been conducted between July 27, 2015 and December 07, 2017. There were no overflows observed at this site during the flow monitoring period. The collected data in conjunction with the hydraulic model analysis have indicated this structure can be permanently eliminated. SSO Structure #153 is in the process of being sealed and the date of elimination will be provided in the next Calendar Quarterly Report.

Four recently discovered SSO Structures (#155, #156, #157, and #158, identified on September 13, 2016, June 6, 2017, September 19, 2017, and November 9, 2017 respectively) were not included in Appendix A of the MCD. Flow meters have been installed at SSO Structures #155, #156, and #157, and these locations will be monitored for overflow activity. SSO Structure #158 is currently part of an active bypass system that prevents any SSOs from this structure until the downstream pipe is cleaned. Once the downstream pipe is cleaned, the City will install a flow monitor at this site. The City has put together or is preparing corrective plans for SSO Structures #155, #156, #157, and #158 with estimated milestones to eliminate these SSO Structures. These corrective plans and schedules are anticipated to be submitted to EPA and MDE in the next Calendar Quarter.

In summary, the City will continue to monitor and evaluate activity at all SSO structures and will continue to keep EPA and MDE advised of progress in future Calendar Quarterly Reports.

2.2 Building Backups

The MCD includes enhanced measures to investigate and address Building Backups. Appendix E of the MCD requires an Expedited Reimbursement Program to reimburse City residents for verified cleanup/disinfection costs arising from Building Backups caused by wet weather surcharging in the Collection System. Data from the program will be reported on an annual basis beginning in the Quarterly Report due following the one-year anniversary of the program. Per Appendix E, the program will begin 6 months after Date of Entry and data will be available in Quarterly Report No.7 for the Calendar Quarter ending June 30, 2019. The City is currently developing the necessary documents and electronic systems to manage the program appropriately.

The Expedited Reimbursement Program will be advertised through various media, including the DPW website, community outreach events, billing inserts, and the guide distributed to customers when the City responds to sewage backups.

The attachments following this Quarterly Report summarize the required information for Building Backups that occurred in the Calendar Quarter. Table 2-2 will provide the current status of requests under the Expedited Reimbursement Program beginning in Quarterly Report No.7 for the Calendar Quarter ending June 30, 2019. The events noted in the attachments and Table 2-2 may have a variety of causes, including roots; improper disposal of wipes, fats, oil, and grease (FOG), or other inappropriate items; infiltration and/or inflow; or issues in public or private infrastructure. Building Backups are addressed once they are reported to the City. DPW has several proactive programs to address Building Backups including targeted cleaning, FOG abatement, root control, and SSO root cause analysis. A rain event for the purposes of reporting in Table 2-2 is defined as 0.5 inches of rain.

- Attachment 3, Reported Building Backups during the Calendar Quarter, pursuant to sub-paragraph 21.i.
- Attachment 4, Map of Reported Building Backups during the Calendar Quarter, pursuant to sub-paragraph 21.i.

Table 2-2. Expedited Reimbursement Program

This table not applicable to this Calendar Quarter.

3.0 Phase I Projects

Phase I project work completed during this Calendar Quarter is categorized by work completed in each of the City's eight (8) sewersheds. The Phase I projects are shown in Appendix B of the MCD, which includes capital projects in the Collection System, as well as the Back River WWTP Headworks Project. In addition to the Phase I projects, the City performs sanitary sewer infrastructure work through various on-call contracts as part of its routine maintenance of the Collection System or to expedite certain needed work. The on-call work improves the Collection System by performing similar types of work (repairing existing assets or installing new infrastructure) to what is required in the Phase I projects, but is done on an as-needed basis.

Percent complete graphs for the Phase I work accomplished in each sewershed through the end of this Calendar Quarter are shown as part of Figure 3-1. The percentage complete graphs are shown for:

- Sewer pipes rehabilitated by Cured-in-Place Pipe lining (LF, linear feet)
- Sewer pipes replaced (LF, linear feet)
- Manhole rehabilitations (number of)
- Sewer House Connection rehabilitations (number of)

Figure 3-1 also contains a table for Phase I project structural rehabilitation progress and a map with the sewershed boundaries and the locations for current SSO structures.

Two Phase I project milestones were achieved during the Calendar Quarter. Sanitary Contract (SC) 902 Sewer Rehabilitation in Dundalk Sewershed and SC 937 Sewer Rehabilitation in Herring Run Sewershed received Conditional Acceptance for construction completion in the Calendar Quarter.

SC 937 lining sewer laterals

SC 902 CIPP lining work

The Back River Wastewater Treatment Plant (WWTP) Headworks Project is also a Phase I project included in Appendix B of the MCD. Progress photos for work completed throughout the Calendar Quarter are provided below. Table 3-1 defines the expected milestones and progress towards achieving the project milestones.

Back River WWTP Headworks Project progress photo
October 2017

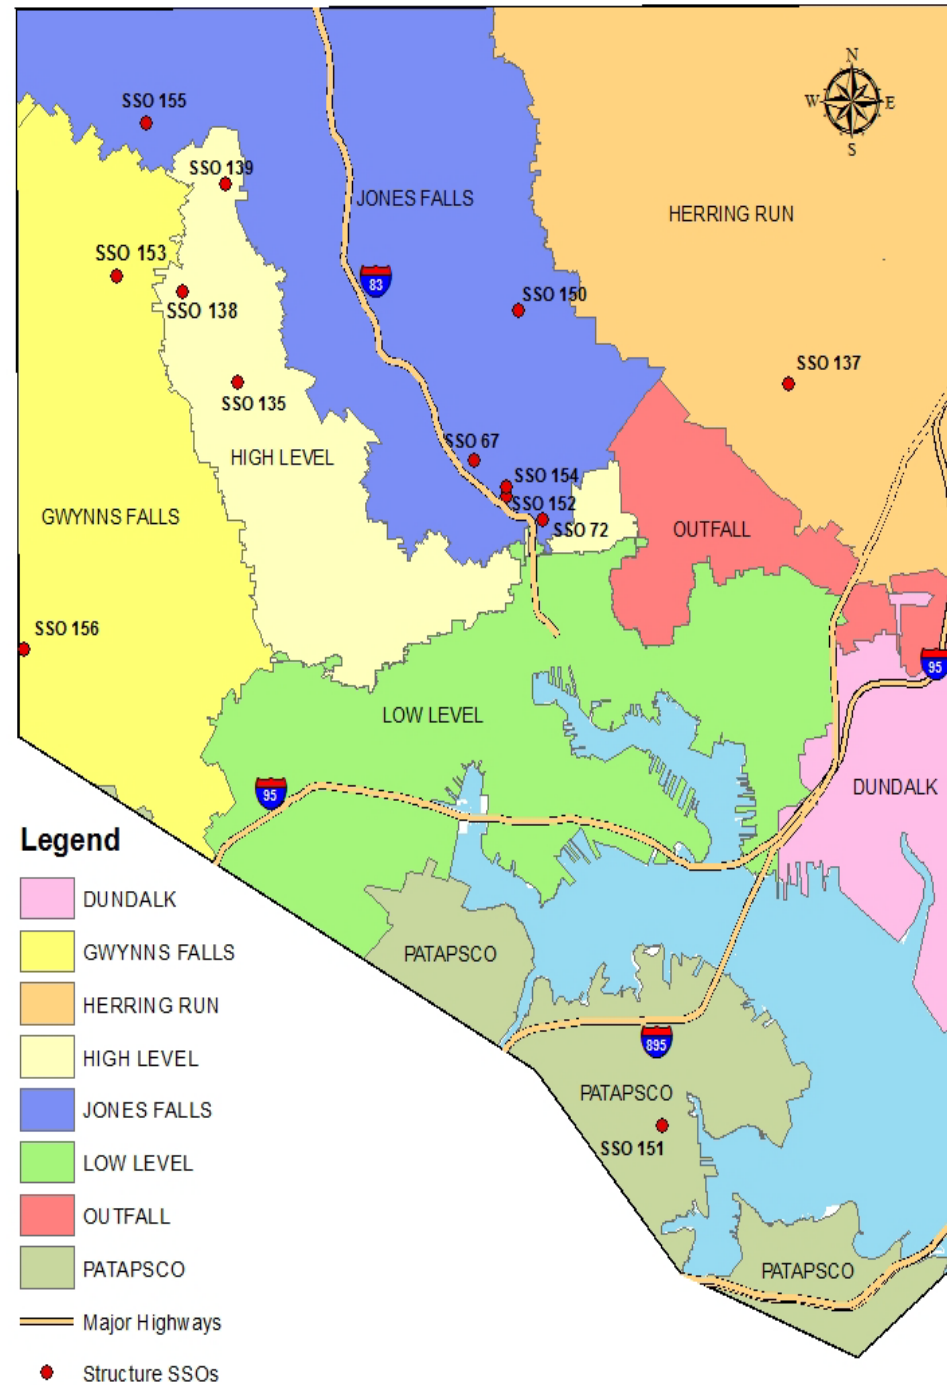

Back River WWTP Headworks Project progress photo
November 2017

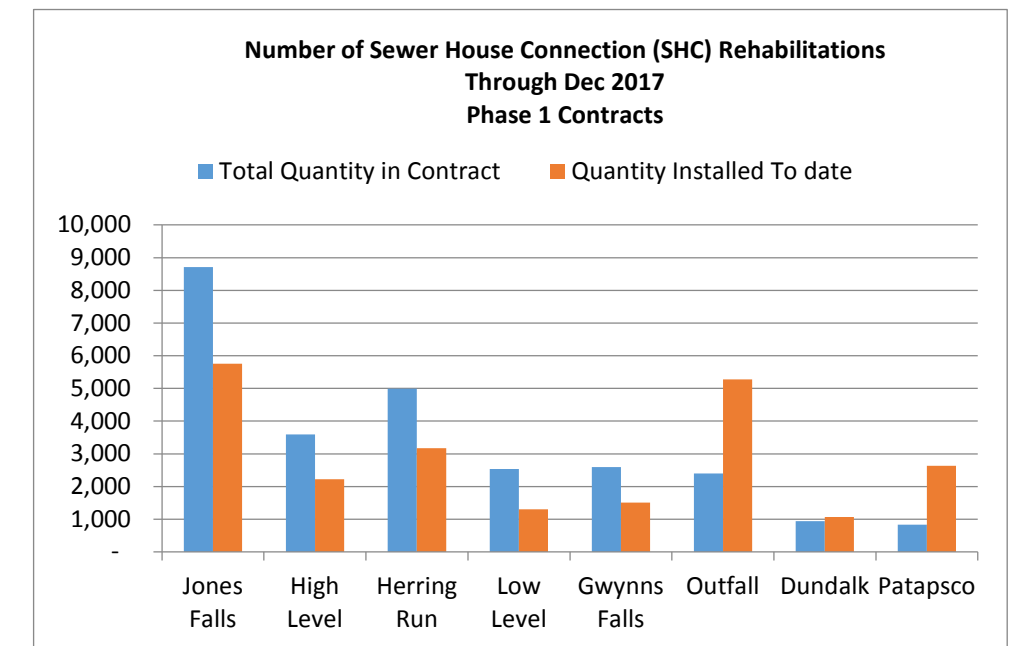

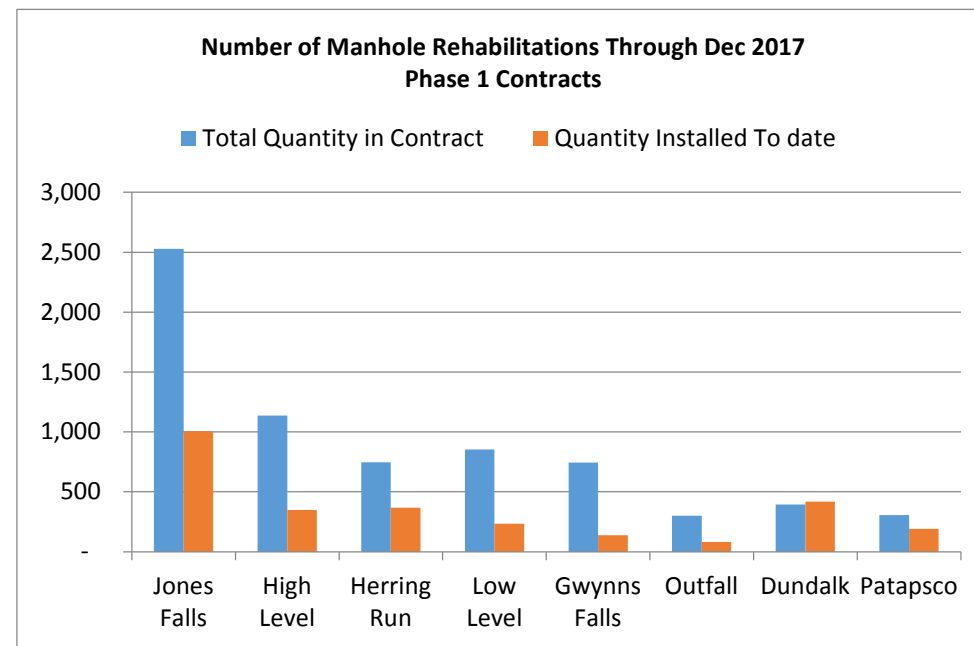

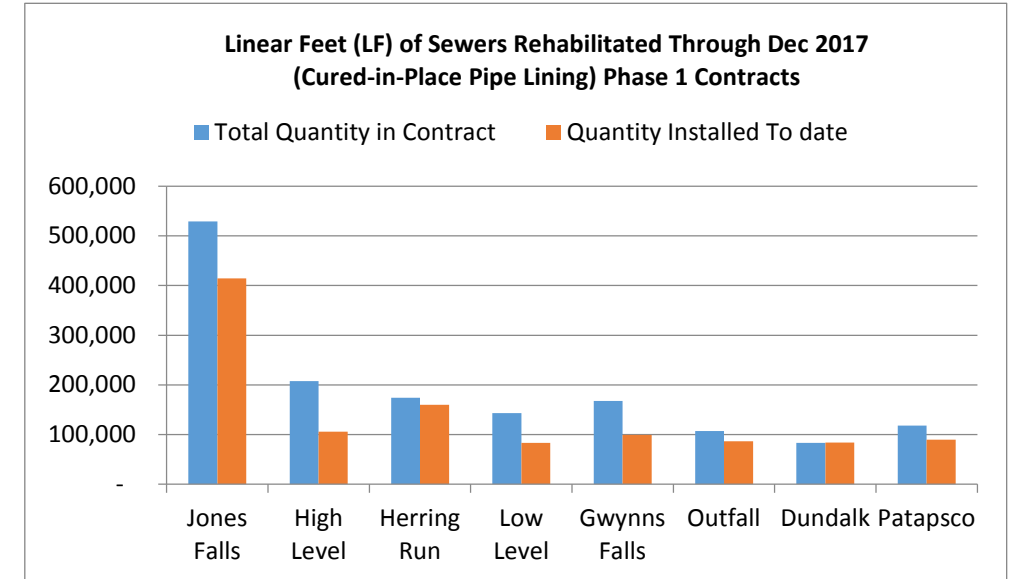

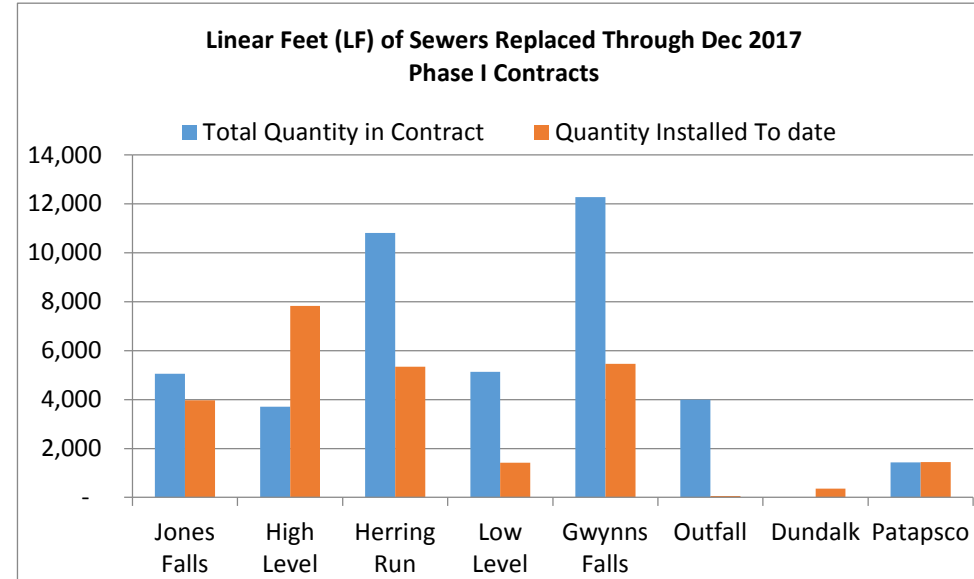

Back River WWTP Headworks Project progress photos December 2017

Table 3-1. Back River WWTP Headworks Milestones

Project Description	Notice to Proceed (NTP)	Substantial Completion Date	Status
36M Gal of storage (equalization facilities) Influent Pumping Station facility Fine screening and grit removal facilities	June 29, 2017	January 1, 2021	Progressing steadily with work associated with excavation and site preparation for construction of the foundation at the new Influent Pumping Station (IPS).

Note: The map also identifies SSO structures.

Phase I Project Total Rehabilitation Details Through December 2017							
CIPP (LF)	Point Repair (EA)	Point Repair (LF)	Pipe Replacement (LF)	Manhole Rehab (EA)	SHC Rehab (EA)	Cleaning (LF)	New Pipe (LF)
1,123,055	2,146	6,915	25,900	2,789	22,940	421,838	6,252

Figure 3-1. Phase I Project Work Completed during Calendar Quarter

4.0 Phase II Projects

The City will implement an adaptive management approach for Phase II Projects. Upon completion of the Phase I projects as addressed in Section 3, the City will perform post-construction flow and rainfall monitoring to determine the effectiveness of the Phase I projects. At that point, the City will be able to develop the Phase II projects and/or corrective actions. The Phase II Plan must be submitted to EPA and MDE by December 31, 2022. Specifically, the Phase II Plan must address any remaining deficiencies identified during the sewershed studies performed under the 2002 Consent Decree needed to achieve the required five-year Level of Protection (LOP), with additional measures to achieve a ten-year LOP in identified sensitive areas.

Although no specific Phase II activities were conducted during this Calendar Quarter, the City routinely performs post-construction flow monitoring and evaluates data to enable accurate planning for Phase II.

5.0 Flow Monitoring and Information Management

Under sub-paragraph 9.h., the City is required to report on rainfall and flow monitoring up to two years following completion of all Phase I and Phase II Projects.

Table 5-1 summarizes rainfall and flow monitoring data for the three month period ending thirty (30) days before the end of the Calendar Quarter. An electronic data table provided as an attachment via compact disk to this Quarterly Report contains this information.

Table 5-1. Rainfall and Flow Monitoring

Flow Monitoring Location	Average Daily Flow (MGD)	Peak Flow (MGD)	Rain Gauge Location	Average Hourly Rainfall Amounts (in)	Peak Hourly Rainfall Intensity (in/hr)

P8_05_SRPS	2.380	5.213	JF12	0.002	0.360

Updates to the City's hydraulic model of the Collection System have been performed based on improvements to the collection and transmission system. The hydraulic model is a mathematical representation of the sewer system (pipes 10" or larger) that can be used to perform detailed hydraulic calculations necessary to accurately represent a wastewater collection system. The model enables the City to consider a wide array of system conditions and alternative solutions. It is used by the City to get an overall picture of system behavior and more accurately predict how the system will respond under various loading scenarios. The Collection System improvements incorporated this Calendar Quarter include Phase I MCD projects, other City Capital Improvement Projects, and projects implemented by Baltimore County.

6.0 Pumping Station Inspection and Repair

Paragraph 11, Pumping Station Inspection, Rehabilitation and Repair, requires inspection of each Pumping Station within the Collection System on a daily basis and continuous monitoring through a Supervisory Control and Data Acquisition (SCADA) system. Additionally, a preventive maintenance program is required to ensure proper operation and maintenance of the stations. Potential disruptions of Pumping Station operations requires a failure analysis with the results reported as part of the Calendar Quarterly Report.

The City of Baltimore remains in compliance with the inspection, monitoring, preventive maintenance, and failure analysis requirements of the MCD. The Wastewater Facilities Pump Station Division (PS Division) maintains a computerized maintenance management system (CMMS) for tracking work order information. The PS Division will submit copies of files and failure report analyses to EPA and MDE upon failure occurrence.

Table 6-1 summarizes the status of the Progress Report requirements as stated in MCD subparagraph 11.d (i) through (v).

Table 6-1. Pumping Station Progress Report for Calendar Quarter

Pumping Station	Number of Inspections	Date of Completion of Inspections	Number of Repair Work Orders	Number of PS-Related SSO Events and Failure Analyses	Failure Analyses Result Summary
Eastern Avenue	180	12/31/17	1	0	N/A
Brooklyn	180	12/31/17	1	0	N/A
Dundalk	180	12/31/17	2	0	N/A
Jones Falls	180	12/31/17	0	0	N/A
Locust Point	180	12/31/17	0	0	N/A
Quad Avenue	180	12/31/17	0	0	N/A
McComas Street	180	12/31/17	0	0	N/A
Westport	180	12/31/17	1	0	N/A
Stony Run ¹	13	12/26/17	0	0	N/A

¹ Pumping station is currently under limited operation and inspected weekly. The contract for rehabilitation work to the pumping station is anticipated to go out for bid in 2018.

7.0 Illegal Connections to the Collection System

Paragraph 10 of the MCD mandates the City to identify and address illegal connections to the Collection System as required by the City's approved Illegal Sewer Connection Detection and Enforcement Plan. Article 25, Section 2-3 of the Baltimore City Code prohibits the discharge of "any stormwater, ground water, roof run-off, subsurface drainage, uncontaminated cooling water, or unpolluted water in any sanitary sewer." Connections that discharge these flows are illegal unless authorized by the Department of Public Works. During the sewershed studies performed under the 2002 Consent Decree, the City identified and abated a number of illegal connections to the Collection System. The City continues to enforce these requirements. If the City verifies an illegal connection, the City will mandate the abatement of the connection or issue a permit as appropriate under the circumstances. The City may discover illegal connections while performing inspections, maintenance, or construction activity.

Table 7-1 summarizes the Illegal Connection Status for this Calendar Quarter. All illegal connections identified to date have been abated, no activity to report for the Calendar Quarter.

Table 7-1. Illegal Connection Status for Calendar Quarter

This table not applicable to this Calendar Quarter.

8.0 Sanitary Discharges of Unknown Origin

Paragraph 15 of the MCD requires the City to investigate and eliminate Sanitary Discharges of Unknown Origin (SDUOs). SDUOs may be composed of numerous public or private sources that contribute to a combined discharge through the storm sewer system. Any discharge source that is verified as a Collection System asset must be reported as an SSO pursuant to sub-paragraph 17.e of the MCD, and is subject to stipulated penalties.

Under sub-paragraph 15.a, the City must submit a SDUO Plan for approval within 120 days of Date of Entry, and will implement the SDUO Plan upon receipt of approval from EPA and MDE. If a discharge is confirmed as a cross-connection (i.e., a direct, piped connection between the Collection System and storm sewer system), the City must submit a schedule within 60 days to eliminate the cross-connection.

The SDUO Plan is anticipated to be submitted to EPA and MDE prior to the 120-day deadline. The table in the following attachment to this Quarterly Report summarizes the required information for SDUOs that occurred or were identified in the Calendar Quarter, including previously reported SDUOs confirmed during the Calendar Quarter as SSOs.

- Attachment 5, Sanitary Discharges of Unknown Origin, pursuant to sub-paragraph 15.f, sub-paragraph 21.g., and sub-paragraph 21.h.

9.0 MCD Compliance Issues

Sub-paragraphs 21.c and 21.d require the City to describe any problems anticipated with respect to meeting the requirements of Section VI, of the MCD (Remedial Measures), and to bring any additional matters that the City believes should be brought to the attention of EPA and MDE. This section highlights the City's concerns.

The City remains concerned that the Baltimore County Consent Decree implementation schedule requires the City to make planning and design assumptions based on the anticipated amount of future flow from the County. The amount of flow entering the City's Collection System is affected by the County's Consent Decree schedule and the effectiveness of County projects in reducing extraneous flow and SSOs from the County's Collection System. Since the County's flow accounts for approximately 50 percent of the flow entering the City's wastewater treatment plants, the success (or failure) of the County's Consent Decree projects has the potential to require significant design or construction changes late in the City's project implementation cycle. The City has used reasonable, conservative assumptions to project the County's future flows based on best engineering practices, but the impact of potential changes based on actual results late in the City's project implementation schedule would be significant.

The City continues to be challenged by a lack of contractor capacity to meet the demand for wastewater utility contracts in Baltimore and the surrounding region. There are a significant number of Collection System Consent Decrees in Maryland and the nearby region, including Baltimore City, Baltimore County, the Washington Suburban Sanitary Commission (WSSC), DC Water, and a number of other large jurisdictions. Each of these entities is issuing a significant amount of wastewater utility contracts, and the local contracting community has limited resources available to meet these escalating demands. In particular, the City has experienced the following adverse impacts associated with contracting capacity:

- Unbalanced project bids;
- Fewer prospective bidders;
- Insufficient numbers of crews assigned to projects;
- Untrained or inexperienced crews assigned to projects; and
- Increased need for re-work due to poor quality installation.

These issues potentially create significant project completion delays and much higher costs associated with both initial project bidding and on-going project re-work. The City continues to utilize best practices to mitigate aforementioned challenges and is currently on track to meet the January 1, 2021 deadline for completion of Phase 1 projects.

10.0 Annual Costs for Appendix B Projects

This section will be updated annually after the fourth quarter following the October 6, 2017 Date of Entry of the MCD and will be updated annually thereafter. Reported costs incurred will reflect capital expenditures, funds disbursed by the City of Baltimore Finance Department, for the Calendar Quarterly Report submitted in October 2018.

Table 10-1. Costs Incurred to Date

Attachment 4. Map of Reported Building Backups during the Calendar Quarter

Attachment 5. Sanitary Discharges of Unknown Origin

SDUO #	Date Occurrence Recorded	Location	Zip Code	Date of 5-day Report	Water Body Affected	Source Investigation Measures ¹	Planned Future Work ¹	Resolution ² Date	Duration (days)	Estimated Volume ^{3,4} (gallons)
17BR01	3/3/2017	Chesterfield Ave & Kavon Ave	21206		Back River	<i>Sanitary lateral is leaking to inlet. Investigation has been on-going to determine the leaking asset. Point repair has been done. 12 ft of sanitary lateral has been replaced. Additional homes investigated.</i>	<i>Repair/replacement of leaking asset. In monitoring stage to confirm abatement. More repairs needed.</i>	Not resolved	On-going	3,802
17JF02	6/1/2017	101 W Read Street	21201		Jones Falls	<i>Portion of apartment building found connected to the storm. DPW is working with owner to take the proper measurement. Issue has been escalated to abate SDUO ASAP. Repairs started 12/27/17.</i>	<i>Abatement is in-progress. Confirmation testing will begin when repairs are completed.</i>	Not resolved	On-going	1,196,208
17JF04	7/14/2017	1001 Wilmot Court	21202		Jones Falls	Sewage found leaking from apartment building due to multiple issues. Point-repair and extensive cleaning has caused to relief sewage.	City lining contractor reinstated the service connection. Cleanout capped. Discovered SDUO at neighboring address entering storm at same location. City contractor completed additional repairs. SDUO abated.	10/19/2017	97	209,520
17GF01	8/9/2017	3208 Milford Ave.	21207		Gwynns Falls	Direct connection to the storm system. Appeared to be combined system in the past. Determined to be DPW responsibility.	OLRA is working on permission to enter private property for repair. UMD performing repairs starting 12/4/17, not an SSO. Repair work completed SDUO abated.	12/7/2017	120	27,648
17GF02	8/15/2017	4202 Maine Ave.	21207		Gwynns Falls	Damaged lateral causing sewage to backup and overflow from cleanout. Owner has been engaged to hire a contractor to correct the situation.	Owner has replaced lateral which abated SDUO.	9/15/2017	31	4,464
17GF03	9/27/2017	5104 Norwood Ave	21207		Gwynns Falls	Sewage from house connection infiltrating into the clearwater pipe leading into the stormdrain. Investigating if leak is on public or private property. Owner was notified it is a private issue.	Owner working with insurance company.	Not Resolved	On-going	2,326
17BR02	10/17/2017	6001 Harford Rd.	21214		Moores Run	SDUO found during routine sampling. Found building with direct connection to stormdrain.	Owner hired contractor to make repairs. Repair were completed. SDUO is abated.	11/3/2017	73	5,386
17JF05	10/19/2017	1035 Wilmot Court	21202		Jones Falls	Sewage found leaking from apartment building sanitary pipes in basement entering storm. HABC has been notified and are currently working on a repair.	HABC repaired internal problem. Found damaged lateral on City side sent to contractor for repair, not an SSO. Repair completed on 12/7/17. Waiting for 2nd confirmation.	Not Resolved	On-going	157,680
17JF06	11/8/2017	2231 Crest Road	21209	11/14/2017	Western Run	Sewage leaking into storm drain inlet pipe from a lateral servicing multiple properties.	SSO repaired by UMD.	11/14/2017	14	1,008

¹ Grey italicized text in the table represents information from the previous Calendar Quarterly Report, updates for this Calendar Quarter are provided in black text.
² For sites that have not yet been resolved, "Estimated Volume (Gal)" is readjusted each quarter to reflect the elapse of time and any recent field information (flow, NH3, TKN) that may have been collected for a given site.
³ For all active sites, the City ultimately, plans on calculating flows using TKN - per guidelines of the approved protocol by EPA; flows calculated utilizing TKN or Ammonia concentrations
⁴ Volume is calculated based on the Sewer Discharges of Unknown Origin Quantification Protocol dated November 12, 2010, and submitted by the City to the U.S. Environmental Protection Agency (EPA) on November 18, 2010.
