Sanitary Contract 963 - Improvements to the Sanitary Sewers in the south west area of Baltimore City
and Maidens Choice Pressure Sewer Assessment and Upland Sewer Replacement

June 1, 2021

To whom it may concern,
Below is the project construction status update

Work in Progress

- Construction activity has started in the Gwynn's Fall Park area. Work has begun in the area directly south of Frederick Road to Wilkens Avenue and the area directly south of Wilkens Avenue to the Carrollton Viaduct.
 - The work will involve cleaning and TV inspecting the sewer lines.
 - Piping will be temporarily installed on the ground to pump the wastewater flow during the work.
 - The Contractor's TV truck and cleaning equipment will be on Park property but will not be parked on the trail.
 - During this stage of the project there are no plans for any excavation.
 - The trail will not be closed, signs will be posted, a copy is attached.

Upcoming work (June 2021)

- Replacement/repair of sewer lines will begin in June 2021. The exact nature of the work will not be known until the TV inspection of the sewer lines (as noted above) is completed and reviewed. Whatever method of replacement/repair is needed, the Park and the Gwynn's Fall Trail will remain open.

We hope this provides insight for the upcoming work as we strive to timely and safety complete this project. If you have any questions, please call. Additional information and resource area also available at our website <https://publicworks.baltimorecity.gov>

Sincerely,

Jerry Henger
