Sanitary Contract 941 (Sewer Collection System Improvements in the Jones Falls Sewershed)

June 1, 2021

To whom it may concern,

Below is the construction status of project SC941.

Project Limits

The SC941 work area is within the Jones Falls Sewershed and includes work along the Jones Falls River and Falls Road. The project also includes upsizing (from 30 inch to 48 inch diameter) of the pressure sewer east of Broadway and north of Chase St. The Work Area is largely east of Interstate 83 and west of Route 1. This project will help eliminate two (2) of the City's Sanitary Sewer Overflows (SSO) - SSO 67 and SSO 72. Besides the ongoing impact at Falls Road, the other neighborhoods are impacted by Cured in Place (CIPP) lining, Manhole Rehabilitation, etc. These neighborhoods are in Districts 11, 12 and 14. Approximately completion of project to date is 67%.
