Sanitary Contract SC956 (Sanitary Sewer Collection System Improvements to the High Level Sewershed)

January 1, 2021

To Whom It May Concern,

Below is the project construction status update. As of the writing of this memo the Project stands at 100% complete of the Contract's scope of work. The Contractor has completed most punch list items for corrections to work already performed, and major disturbances for work under the project's scope are not to be expected.

The purpose of this project is to:

- Repair the aging sewer system
- Prevent sewer back-ups into private property
- Reduce/eliminate sewer overflows
- Improve sewage flows and pipe capacity

Project Work has been completed!

DPW would like to thank all of our community partners for the cooperation through the disturbances and disruptions created during the execution of this vitally important project. We understand that through this pandemic such efforts are even more taxing, so we commend you on helping the agency see it through to conclusion. If you have any question, you may call (410) 396-4700, Monday through Friday, between 8:30 AM and 4:30 PM. Additional information and resources are also available on our website <https://publicworks.baltimorecity.gov/dpw-engineering-construction-projects> .

Sincerely,

Franco Egbe *Franco Egbe Tako*
