Sanitary Contract 963 - Improvements to the Sanitary Sewers in the south west area of Baltimore City and Maidens Choice Pressure Sewer Assessment and Upland Sewer Replacement

July 1, 2021

To whom it may concern,

Below is the project construction status update

**Work in Progress**

- Construction activity has started in the Gwynn's Fall Park area. Work has begun in the area directly south of Frederick Road to Wilkens Avenue and the area directly south of Wilkens Avenue to the Carrolton Viaduct.
  - The work will involve cleaning and TV inspecting the sewer lines.
  - Piping will be temporarily installed on the ground to pump the wastewater flow during the work.
  - The Contractor's TV truck and cleaning equipment will be on Park property but will not be parked on the trail where possible.
  - During this stage of the project there are no plans for any excavation.
  - The trail will not be closed, signs will be posted, a copy is attached.

**Upcoming work (July 2021)**

- Replacement/repair of sewer lines will begin in late June/July 2021. The work will involve excavation at some areas. Other areas will be CIPP lined (internal repairs of the pipe without excavation).
  - Some of the CIPP lining work will require the Park trail to be closed for a short period of time, 12 to 18 hours.
  - A portion of the sewer line underneath the stream will require excavation to repair the damage to it. This work will not require closure of the Park trail.

We hope this provides insight for the upcoming work as we strive to timely and safely complete this project. If you have any questions, please call. Additional information and resource area also available at our website <https://publicworks.baltimorecity.gov>

Sincerely,

Jerry Henger  
Construction Project Supervisor I
